

Himanshu Mamgain

Software Developer

+91-8287338737 | himanshu.mamgain.dev@gmail.com | New Delhi, INDIA | Experience: 3 Years 1 Month | <https://himanshu-mamgain.github.io/>

Experienced MERN Stack Developer with expertise in MongoDB, Express.js, React, and Node.js. Skilled in designing and implementing scalable RESTful APIs and full-stack solutions that enhance application performance and user experience. Adept at developing clean architecture, component-based UI design, and sustainable systems to effectively address complex business challenges. Committed to optimizing system efficiency and delivering high-quality, robust web applications aligned with industry best practices.

SKILLS

- | | | |
|-----------------|---------------|---------------------|
| • Java | • Node.js | • Node Js Developer |
| • Nestjs | • Mern Stack | • React.Js |
| • MongoDB | • GraphQL | • PostgreSQL |
| • Typeorm | • Sequelize | • TypeScript |
| • AWS | • Redis | • Redux |
| • Npm | • GIT | • Github |
| • Gitlab | • Amazon Sqs | • Kafka |
| • Kafka Streams | • Express | • generative ai |
| • OpenAI | • Claude Code | • Spring Boot |

WORK EXPERIENCE

Software Developer - Antino Labs

Jun 2024 - Present

- Spearheaded back-end development and deployment of a robust payment system, overseeing end-to-end workflows and feature integration to ensure high scalability and reliability.
- Engineered a custom checkout platform integrating four major payment gateways: Cashfree, Razorpay, PhonePe, and Pine Labs.
- Developed auto-pay functionality utilizing PhonePe to enhance user convenience and transaction automation.
- Delivered a scalable Electric Vehicle charging solution supporting 5,000+ users, implementing OCPP and OCPI protocols for seamless API integration with external fleets.
- Architected a scalable payments microservice platform using Spring Boot, leveraging RESTful APIs, Redis, and WebRTC technologies.
- Integrated real-time communication via Agora and managed deployments through Docker and AWS EC2, automating processes with CI/CD pipelines.

Software Developer - I2pify.ai

Dec 2023 - Apr 2024

- Designed and developed scalable RESTful APIs for a comprehensive hotel management system supporting multiple hotels, restaurants, and event services.
- Implemented complex reservation logic and personalized user notification workflows to enhance user engagement across the platform.
- Integrated Razorpay payment gateway to facilitate secure processing of hotel, restaurant, and event bookings, managing monthly transaction volumes exceeding INR 100,000.
- Enhanced payment settlement traceability through optimized integration and transaction monitoring.
- Developed a custom payment gateway service and initiated integration of Bank of Baroda APIs using NestJS, enabling direct banking transactions within the platform.

Associate Developer - Celebal Technologies

May 2023 - Dec 2023

- Developed a Microsoft Teams chatbot using Azure Bot Service and Cosmos DB for a healthcare organization, enabling secure real-time messaging, document sharing, and FTP-based data exchange across departments.
- Streamlined inter-departmental coordination by 60% and accelerated data delivery time by 30%.
- Revamped a button-based chatbot leveraging DFS logic and Azure Bot Services, enhancing system scalability and

increasing response accuracy by 40%.
- Created a custom npm package for dynamic intent handling integrated with PostgreSQL, reducing manual configuration efforts by 60%.

PROJECTS

Onion Ai

5 Days

Developed Onion AI, an open-source Node.js package that simplifies integration with Large Language Models (LLMs) by providing reusable utilities for prompt management, structured AI responses, and API abstraction. Designed with a modular, developer-friendly architecture using TypeScript, enabling faster AI feature development, improved maintainability, and seamless integration into backend applications.

EDUCATION

2023
